

Reno Racer Relentless NXT makes an appearance on Sunday July 15th

Nemesis NXT (which stands for Neoteric eXperimental Technology) is a two place, retractable gear, single engine, kit airplane of all molded carbon fiber construction allowing a very sleek aerodynamic profile.

Nemesis NXT is a high performance, breathtakingly personal transportation and racing airplane available in kit form.

The design of the NXT is a result of extensive wind tunnel testing, thorough computer modeling, coupled with nine years of experience (and success) of the race plane, Nemesis.

The NXT is a precision handcrafted, high performance kit airplane, built with the highest quality materials. Each NXT receives meticulous attention in every detail.
